BOARD OF MANAGERS MEETING - 7:00 pm

Castle Rock Townhall 2537 240th St W Farmington, MN 55024

1. Call to Order

* Indicates that support materials are included within the packet

- 2. Approval of Agenda
- 3. Audience

Anyone in the audience wishing to address the Board regarding an item that is not on the agenda may come forward at this time.

- 4. Consent Agenda
 - 4.1 July 20, 2022 Meeting Minutes*
 - 4.2 Invoices for Payment*
 - 4.3 Year-to-Date Financial Summary*
- 5. New Business
 - 5.1 Approve Draft Watershed Plan for 60-day Review
 - 5.2 Approve 2023 Budget and Dues*
 - 5.3 Approve 2023 Workplan with SWCD*
 - 5.4 Review 2021 Water Monitoring Report*
 - 5.5 Review 2022 Landscaping for Clean Water Summary*
 - 5.6 Delegate Data Practices Authority
 - 5.7 Approve 2023 Meeting Schedule
 - February 1, 2023
 - April 12, 2023
 - July 19, 2023
 - November 15, 2023
- 6. Agenda Items and Location for February 1, 2023 Meeting
- 7. Member Community Reports
- 8. Adjournment

DRAFT MINUTES

BOARD OF MANAGERS

July 20, 2022 7:00 p.m. Lake Byllesby

<u>Annual Tour:</u> Prior to the meeting, Josh Peterson, Dakota County, Senior Water Resources Engineer lead a tour of the Byllesby Dam. There have been upgrades to the dam and he provided an overview of the project.

NCRWMO Managers Present:

Rodney Weber Frank Wergin Greg Langer Dan Peine Don Dinesen Nancy Sauber Sandy Weber Douglas Township Waterford Township Greenvale Township Hampton Township Randolph Township Eureka Township Castle Rock Township

Others Present:

Ashley Gallagher, Dakota County SWCD Staff Jayne Hager Dee, Dakota County SWCD Board Erv Ulrich, Greenvale Resident Tom Krauter, Randolph Township

1. Call to Order

Chair Weber called the meeting to order at 7:10 p.m.

2. Approval of Agenda

Motion by Peine, second by Langer to approve the agenda. Motion carried.

3. Audience

Weber asked if there was anyone in the audience that wished to address the Board on an item that is not on the agenda. No one appeared.

4. Consent Agenda

- 4.1 April 20, 2022 Meeting Minutes
- 4.2 Invoices for Payment
- 4.3 Year-to-Date Financial Summary

Grammatical correction noted in minutes. Additional ISG invoice arrived a day prior to the meeting and was presented to the Treasurer/Board. Treasurer inquired about CD as it will be maturing in August. Money in CD has been budgeted for the Watershed Plan update and will be needed to pay invoices.

Motion by Dan Peine, second by Tony Van De Steeg to allow CD to mature and transfer to savings or checking. Motion carried.

Motion by Rodney Weber, second by Nancy Sauber to approve consent agenda. Motion carried.

5. New Business

5.1 Approve NCRWMO Watershed Plan Framework

The framework was prepared by ISG based on input from Technical and Advisory Committees. Administrator presented the document to the Board. There was a question on cover crops and how accepted and widely implemented are they. It will take more education and outreach to reach more farmers. Noted a few times that education and outreach is its own issue but it does cross over into almost all other issues. Board understands the definitions, difference between tier 1 and tier 2, and supports the framework. ISG will continue to update the plan. It is anticipated that a draft will be ready for internal review (including the Board) in September/October and will be ready for official 60-day review at the November NCRWMO Board meeting.

Motion by Nancy Sauber, second by Greg Langer to approve the framework as presented.

5.2 Approve Updated Data Practices Policy

It is a requirement to review/update the Data Practices policy every five years. There are no major changes to the policy besides noting that electronic format is acceptable. Upon approval the policy will be sent to the Minnesota Historical Society.

Motion by Greg Langer, second by Dan Peine to approve and submit the updated data practices policy. Motion carrier.

5.3 SWCD/County Grant from MDH to Review Mining Ordinances Countywide

Administrator provided an overview of the upcoming project. Townships expressed interest and do see some pressure for new mines. There are also existing mines that have historically worked well with townships. Townships do not want businesses to be targeted. Targeting business is not the intent of the project. Nothing will be required of the townships and cities but there will be an updated model ordinance that could be adopted. Many think it is a timely project and are looking forward to the results.

5.4 Capital Improvements Projects (CIP) Discussion

The draft Capital Improvements section of the Watershed Plan was reviewed and used as a starting point for discussion. There was discussion on road projects and culverts. Townships typically do a road tour and report every year. These reports could be compiled to determine if there could be a water quality and/or water storage component to the project. This does seem feasible and a possible strategy for CIP in the updated Watershed Plan.

6. Agenda Items and Location for November 16, 2022 Tour and Meeting

Castle Rock Township volunteered to host the meeting.

7. Member Community Reports

MPCA was out doing fish survey on Chub Creek. They stated they found 22 species of fish.

Update that the County ACRE Plan is out for a 45-day public comment period. Staff will be visiting all townships to provide and update. Draft is posted online, and comments can be submitted at any time.

8. Adjournment - Motion by Peine, second by Wergin to adjourn the meeting. Motion carried. Meeting adjourned at 8:00 p.m.

2023 Work Plan and Budget North Cannon River Watershed Management Organization

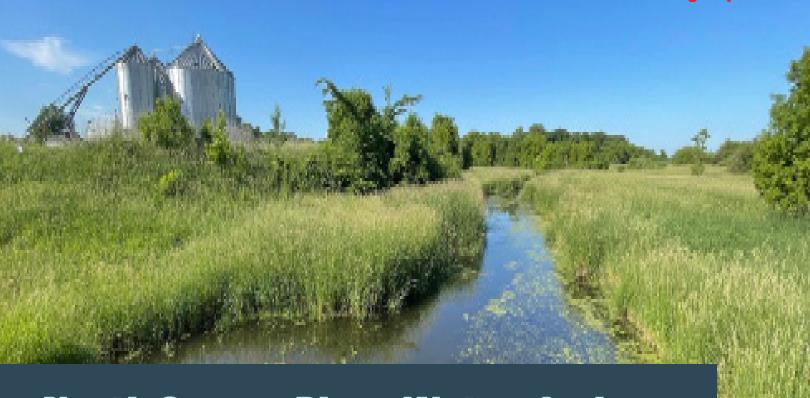

Technical Assistance	Hours	Rate	Fees	
Water Monitoring	95	\$90.00	\$1,209.00	\$9,759.00
Staff time for routine and event sampling. Lab analysis for bacteria, nutrients and soilds. Data analysis, compliation and reporting to MPCA. Create report and present findings to NCRWMO Board.	Estimated even	ts at \$90.2	nd 4 runoff	
Landscaping for Clean Water			\$1,500.00	\$1,500.00
Technical assitance to homeowners including layout, midpoint and final inspections for raingardens, native plantings and shoreline stabilizations.	\$500	times 3 pr	ojects	
Conservation Projects			\$1,000.00	\$1,000.00
Technical and administrative assistance to execute landowner contracts, provide construction oversight and certify completion of the project.				
	Tecl	hnical Assi	stance Total	\$12,259.00

st Share	Fees	Fees	
Landscaping for Clean Water	\$750.00	\$750.00	
Provide cost share to landowners for projects including raingardens, native plantings and shoreline stabilization projects consistent with SWCD cost share policies.	\$250 times 3 projects		
Conservation Projects	\$3,000.00	\$3,000.00	
Provide cost share to landowners for implementing conservation projects through existing SWCD cost share programs.			
	Cost Share Total	\$3,750.00	

	Total Agreement Not-to Exceed	\$43,659.00
--	-------------------------------	-------------

Note: Additional items may be required of the SWCD during the workplan timeframe and individual budget amounts may change as work progresses. If proposed changes are to exceed the total agreed amount, this work plan will then be amended and re-executed by the NCRWMO and SWCD.

North Cannon River Watershed 2021 Water Monitoring Report

Surface Water Monitoring
Sites by Subwatershed

Chub Creek - 4 Pine Creek - 1 Trout Brook - 3

Monitoring Schedule

1x per month April - October **Monitoring Parameters**

Physical - Chlorohyll-a, Conductivity, Dissolved Oxygen, pH, Sediment, Temperature

Nutrients - Nitrates, Phosphorus

Bacteria - E. coli

Streamflow and stage

Trout Brook Groundwater Monitoring

Quarterly nitrate monitoring at four sentinel springs -Beaver, Fox, Le Duc, Swede

and *three* surface water monitoring sites -TB1, TB2, TB3

Chub Creek Watershed

Chub Creek • Dutch Creek • Mud Creek • North Branch Chub Creek

Impairments Chub Creek

Macroinvertebrates (2014) Fishes (2014) Fecal Coliform (2004)

Dutch Creek

Macroinvertebrates (2016) Fishes (2016)

Mud Creek

Fecal Coliform (2006)

North Branch Chub Creek

Fecal Coliform (2006)

Dutch Creek

Downstream of a wetland complex. Low dissolved oxygen. Warmest water temperature of the four sites. Very low chlorophyll-a, nitrate, total phosphorus, and total suspended solid levels all season. *E. coli* spike mid-summer, but low overall.

The monitoring sites are located near the pour points of smaller subwatersheds (Ductch Creek, Mud Creek, North Branch of Chub Creek) and near the confluence of Chub Creek and the Cannon River.

Mud Creek

Very low dissolved oxygen from mid-summer through fall. Low chlorophyll-a, nitrate, total phosphorus, and total suspended solid levels all season. *E. coli* spike mid-summer and remains high through the fall.

North Branch Chub Creek
Lowest water temperatures and
conductivity in the watershed. Nitrate
levels are just below the drinking water
standard. High E. coli levels starting
mid-summer and continuing through fall.
Suspended solids increase in the latter
part of the season. suspended solid levels
all season. E. coli spike mid-summer, but

Four major rain events hit the watershed during the 2021 monitoring season — February, March, May, and August. Following each event, water levels increased quickly in response to the influx of water running off the land and entering the stream. Due to its size and several tributaries, Chub Creek is not a very flashy system, taking multiple days to flush the water out and return to baseflow conditions.

Chub Creek

low overall.

Consistent temperature, dissolved oxygen, and conductivity levels. Low chlorophyll-a, total phosphorus, and total suspended solid levels all season. Nitrate levels up due influence from North Branch Chub Creek which is upstream. Consistently high *E. coli* levels throughout the whole season.

THE REST

Pine Creek Watershed

Pine Creek

Impairments Nitrates (2010)

Pine Creek

Water temperature is low, remaining in the optimum range for brown trout (< 18 degC) for the entire monitoring season. **Dissolved oxygen is above the standard for cold water streams. Conductivity is lower** that what is found in both the Chub Creek and Trout Brook watersheds.

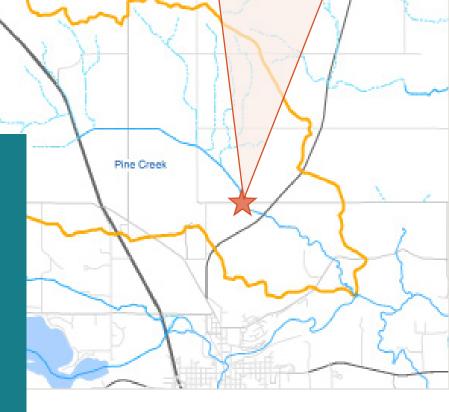

E. coli and nitrate levels are a big concern in the watershed. *E. coli* was above the standard for five of the seven monitoring events (below in April and October). Nitrate was at or exceeded the drinking water standard for six of the seven samples.

Four major rain events hit the watershed during the 2021 monitoring season — February, March, May, and August.
Following each event, water levels increased quickly in response to the influx of water running off the land and entering the stream. Due to its size, Pine Creek is a very flashy stream, returning to baseflow conditions very quickly after each event.

Water quality sampling in the Pine Creek watershed first occurred in 2006 and continued until 2010, before restarting again in 2018. These activities occurred at three sites in the watershed - the current site at the bottom of the watershed, as well as two sites further upstream that are not currently monitored. Monitoring provides natural reource managers with a longterm dataset to use when evaluating watershed health and determining management activities.

Monitoring Partner - Minnesota Department of Natural Resources (MNDNR)

PC3 is part of the MNDNR's stream monitoring program. Water temperature and level are comtinuously monitored and flow measurements are collected intermittently.

Trout Brook Watershed

Trout Brook • Unnamed Tributary

Impairments

Turbidity (2006) Nitrates (2010, 2018*) Macroinvertebrate (2014, 2014*) *different branches

These sites part of the MNDNR's stream monitoring program. Water temperature and level are continuously monitored and flow measurements are collected intermittently by MNDNR staff.

Four major rain events hit the watershed during the 2021 monitoring season — February, March, May, and August. Following each event, water levels increased quickly in response to the influx of water running off the land and entering the stream. Trout Brook responded to the first few rain events and returned to baseflow very quicly. Rain events later on in the season had little impact on stream discharge.

TB2

Cool water all season. Dissolved oxygen drop (still above standard) beginning in June. Highest nitrate level in watershed (influenced by Fox Spring). Phosphorus and sediment remain low. E. coli saw a mid-season spike and remained high through the end of the season.

TB

Cool water all season. Dissolved oxygen drop (still above standard) beginning in June. Nitrate level exceeds state standard throughout the season. Phosphorus levels are highest in the watershed, but sediment remains low. *E. coli* spikes in June, but remains low through the end of the season.

Trout Brook

TR3

Cool water and consistent dissolved oxygen levels all season. Lowest nitrate level of all three sites (possibly influenced by groundwater influx). Phosphorus and sediment remained low all season. *E. coli* spike in the summer months, back down in the early fall.

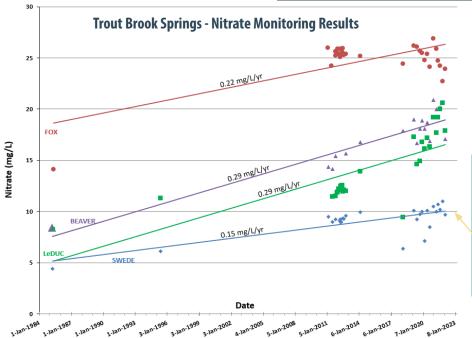

Trout Brook Watershed

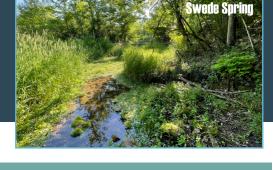

Beaver Spring • Fox Spring • LeDuc Spring • Swede Spring

Nitrate levels at all four sentinel springs continue to rise.

Fox Spring (red; top of the watershed) has the highest levels and Swede Spring (blue; bottom of the watershed) has the lowest nitrate levels in the watershed.

All sites have nitrate levels above the state drinking water standard (10 mg/L).

Sentinel Springs - Beaver, Fox, Le Duc, Swede

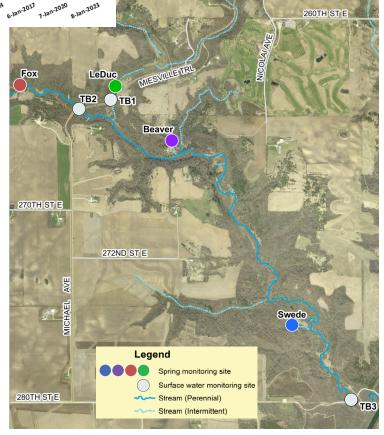

Spring monitoring in the Trout Brook watershed began as a one off effort in 1985. A monitoring strategy was developed as part of the NCRWMO's watershed management plan, resulting in regular monitroing at the same four springs beginning in 2011.

Sampling frequency increased to quarterly in order to get a higher resolution dataset to better understand nitrate levels in the watershed over time.

Monitoring is supported by Dakota County Parks.

2022 LANDSCAPING FOR CLEAN WATER PROGRAM SUMMARY

PROVIDING LANDOWNERS WITH THE SKILLS AND RESOURCES NEEDED TO PROTECT LOCAL WATER QUALITY AND PROVIDE HABITAT FOR POLLINATORS

THROUGH THE INSTALLATION OF BEAUTIFUL RAINGARDENS, NATIVE GARDENS, AND NATIVE SHORELINE PLANTINGS.

2022 BY THE NUMBERS		
355	INDIVIDUALS PARTICIPATED IN INTRODUCTION CLASSES	
176	PROJECTS DESIGNED AS PART OF VIRTUAL DESIGN WORKSHOPS	
39	RAINGARDENS & NATIVE GARDENS & SHORELINES INSTALLED	
3	GRANT ROUNDS WITH 12 WEEK INSTALLATION TIMELINES	
52	PEOPLE RECEIVED ONE-ON-ONE ASSISTANCE VIA ZOOM	
93	INDIVIDUALS PARTICIPATED IN MAINTENANCE WORKSHOPS	

"I loved having support to make sure I was completing the project correctly."

"It was a wonderful experience all around. Will recommend."

2022 LCW Participants

The Landscaping for Clean Water program - Introduction class,
Design course, and
Maintenance workshop - was offered remotely again in 2022.

NORTH CANNON RIVER WATERSHED MANAGEMENT ORGANIZATION

2022

LANDSCAPING FOR CLEAN WATER PROGRAM SUMMARY

Thank you to everyone who joined the cause to reduce pollution, improve water quality, and increase pollinator habitat on your property this year!

Participation at any level - watching the Introduction to Clean Water video, installing a project with the Design Course, or learning some tips and tricks on how to properly maintain your garden with the Maintenance Workshop series - helps to spread interest and know-how to all corners of Dakota County.
